High-Quality Forks in the Design You Need

CASCADE FORKS – A TRADITION OF QUALITY

Only fully tested and approved materials are used in the manufacture of Cascade forks. Guaranteed materials together with fully controlled processes result in forks that meet or exceed all national and international standards (such as ISO2328 and ISO 2330 and ANSI ITSDF B56.11.4) with regards to mountings details, load-,fatigue-and impact-tests.

- All forks manufactured from high grade certified materials.
- All forks fully heat-treated, quenched & tempered to give minimum yield strength of 825 Mpa.
- All forks meet or exceed the requirements of the national and international standards ISO 2328, ISO 2330, ISO 3691-1, ANSI/ITSDF B56.1 and ANSI/ITSDF B56.11.4.
- All fork heels & welds subject to full MPI crack-testing by certificated operatives.
- Material sections available up to 400x150 (75,000 kgs@1200 mm load centre per pair).
- Special "timber-handling" sections available up to 460x50 (19,500 kgs@600 mm load centre per pair).
- All special designs available, including: "off-set" forks; radiused and champhered blades; "peek-a-boo" backs for increased operator visibility, etc.

- **Booforge Steel**, a Cascade subsidiary, offers customized and large lift truck forks, including models with capacities up to 150 tons, for use in demanding applications that require extreme strength.

Providing high-quality forks, when you need them most

Standard FEM/ITA Fork

Tube Fork

Bolt-On Fork
